

# Coventry's New Document Management System

---

Coventry Workers' Comp Services ("Coventry") is doing its part to help protect the environment by going paperless through the implementation of its new Document Management Platform. This new Document Management Platform converts paper case documents into electronic images, allowing Coventry's Care Management team to work even more efficiently in helping get injured workers back to work as soon as possible.

Coventry strives to provide cost-saving workers' compensation solutions for clients. With the increased savings and efficiency from the Document Management Platform, Coventry will be able to further pass on savings to clients.
