Issues: Workers' Compensation Provider Fee Schedule

Summaries: The Commission re-adopted emergency amendments to a rule related to the workers compensation medical fee schedule and telemedicine. The amendments allow for a greater range of providers to offer services and receive reimbursement in response to the pandemic.

Specifically, the amendments update the definition of telemedicine to state that it is the "practice of medicine using electronic communication, information technology, or other means between a physician, physician assistant, nurse practitioner, physical therapist, occupational therapist, speech therapist, psychiatrist, clinical psychologist, or dietitian in one location and a patient in another location with or without intervening health care provider." The amendments add that this expanded set of professionals may only practice telemedicine in Mississippi if they have a valid Mississippi license.
